

Crop Nutrition Club Central Greece

NUTRI-CHECK NET
OPTIMISING CROP NUTRITION

Region: Central Greece (Magnesia)

Members: 5 farms (15-120ha) and 2 advisors

Crops: Maize

Nutrient Management Challenges:

- Difficulty in convincing producers to implement a different nutrient program for their crops. Much effort is needed to change this mindset.
- Difficult to collect reliable data. Inaccuracy of nutrient values, resulting in inappropriate use of nutrients.
- Different challenges due to severe weather events (climate change), but also a major problem in nutrient management due to water scarcity.
