

# Crop Nutrition Club Eastern Greece

**NUTRI-CHECK NET**  
OPTIMISING CROP NUTRITION

**Region: Peloponnese (Messenia)**

**Members: 5 farms (3-10ha) and 2 advisors**

**Crops: Potatoes**

## **Nutrient Management Challenges:**

- Practices using old technologies that cannot provide accurate nutrient management.
- Different challenges due to severe weather events (climate change), but also a major problem in nutrient management due to water scarcity.
- Difficulty in convincing producers to implement a different nutrient program for their crops. Much effort is needed to change this mindset.
