

# Crop Nutrition Club Central Greece

**NUTRI-CHECK NET**  
OPTIMISING CROP NUTRITION

**Region: Central Greece (Thessaly)**

**Members: 5 farms (15-120ha) and 2 advisors**

**Crops: Wheat**

## **Nutrient Management Challenges:**

- Difficult to collect reliable data. Inaccuracy of nutrient values, resulting in inappropriate use of nutrients.
- The application of nutrients is more empirically based by producers. There is no data available to help make the right decisions.
- Drought conditions are more prevalent which influence and complicate decisions on nutrient management
